

TRANSFORMATION THROUGH CHANGE

We help you excel at change and uncover the pivot points for accelerated growth, performance, and profitability

BRIMSTONE

For over 40 years, we have helped extraordinary leaders address their most critical and complex issues and bring a disciplined approach to transformation.

We work side by side with our clients to develop leaders, build strategies, and align teams to navigate change, disruption, and critical issues, leverage opportunities, and to uncover the pivot points for accelerated growth, performance, and profitability.

We ask challenging questions. We help our clients discover opportunities and build capabilities. We help our clients not only change the way work gets done, but also transform the organization.

Leaders come to us to address critical issues, leverage opportunities, and drive transformation in: change, leadership, alignment, talent, strategy, and execution.

Our work includes:

- Business acceleration
- Change enablement
- Culture change
- Executive coaching
- Leadership development
- Leadership team alignment
- Organizational alignment
- Post-merger integration
- Strategy to execution

OUR APPROACH

Our approach harnesses four key drivers, simultaneously, in an integrated and woven way:

- **Develop leaders** at all levels
- **Align teams** around shared goals
- **Change** the way you work
- **Energize people** to make change happen

Focusing on one of these drivers will move the needle, but through our work we have seen that using leadership, alignment, change, and energy in a symbiotic, dynamic way is what will deliver results and create a high performing organization.

OUR DIFFERENTIATORS

We know our stuff

Our team is comprised of entrepreneurs, former C-suite executives, educators, and seasoned process consulting experts. We have the life experiences, business expertise, and “I’ll take on any challenge” mentality that help us quickly understand what leaders are facing and identify ways to help those leaders accomplish what they want to accomplish. We bring maturity, candor, partnership, and a bottom-line focus to every engagement.

We partner

We work side by side with leaders who are committed to making a significant difference. We work with these extraordinary leaders to help them spur big changes in their organizations, business, and industries and to drive transformation.

We have a bias for action

Our methodology, processes, and tools help leaders simultaneously drive results, accelerate leadership development, improve team effectiveness, achieve organizational alignment, and energize the organization. Our partnership not only changes the way work gets done, but also transforms the organization.

Our approach is results oriented, practical, flexible, and hands-on. Our advice is neither theoretical nor academic – we help you get real work done, achieve real results, solve real problems. And we know you need to move quickly and inspire others to do the same. We listen, we assess, we advise, we help you plan, we intervene, we help you take action.

We care

Our team cares about you and your business. Our North Star value is “to be of service” and helping our clients is at the heart of everything we do. We build meaningful relationships and we deeply value the individuals and teams we serve.
